TILT DITCHING BUCKET

The new design of the Tilt Ditching Bucket features a flatter profile, open heel and bigger radius for level grading on uneven terrain. With the versatility of a 45 degree tilt range on each side, you achieve smooth tilting action for an easy, clean finish.

90° Rotation  Crossover Plumbing  Tapered Design  Dual Radius Design

ROTARY TILT DITCHING BUCKET

With a 90 degree tilt range on each side, AMI’s Rotary Tilt Ditching Bucket is designed to reach awkward spots with less repositioning and provide smooth tilting for optimal grading.

DITCHING

Make the grade with an AMI Ditching Bucket. Detailed finishing work requires precision - exactly what AMI offers. The optional serrated edge gives operators a smooth edge while making it easier for penetrating when digging.

HEAVY DUTY

With Hardox 450 wear steel in all wear areas including base edge, side cutter plates, cheek plates and horizontal wear bars this bucket is built for heavy duty excavation.

SEVERE DUTY

With Hardox 450 wear steel in all wear areas including base edge, side cutter plates, larger cheek plates, horizontal wear bars this bucket is built for severe duty, higher abrasion conditions.
When multi-tasking is a must, the AMI Attachments Jawbone 4-in-1 Excavator Bucket responds with a multi-purpose design that digs, grades, grips and clamshells.

**4-IN-1**

When you need to pick up large, heavy objects, grab bucketfuls of debris and clear away brush quickly, get a tighter grip on productivity with AMI’s Graptor Bucket and Graptor Rake.

**GRAPTOR BUCKET**

**GRAPTOR RAKE**

When you need to pick up large, heavy objects, grab bucketfuls of debris and clear away brush quickly, get a tighter grip on productivity with AMI’s Graptor Bucket and Graptor Rake.

**RECESSED PIN DIGGING**

With these Heavy Duty Buckets the pin is recessed into the bucket, giving the operator the convenience of using a pin grab coupler without sacrificing break-out force. Maintaining factory bucket tip radius reduces the risk of the bucket contacting or possibly damaging the excavator is reduced.

**EXTREME SERVICE DIG**

Designed for Extreme Service applications such as road building, and all other extreme digging conditions. Built with 100% Hardox material throughout the complete bucket. Comes standard with base edge weld on segments and pin on side bar protectors.

**EXTREME SERVICE ROCK**

Designed for Extreme Service applications such as road building, mining, quarry applications. Built with 100% Hardox material throughout the complete bucket. Comes standard with base edge weld on segments and pin on side bar protectors. The Extreme Service Duty Rock Bucket adds extra armor along the heel edges for longer life in high abrasive applications.
EXTENDIBLE STICK
Make the reach with extra length using AMI’s extendible stick for excavators. The reinforced outer case provides strength and rigidity while minimizing torsional forces. The bucket cylinder travels with the stick’s extension giving you full control in both positions.

STUMP HARVESTER
Dig, split, shear and load with the ultimate wood harvesting attachment. Ideal for land clearing and wood processing applications where productivity and control are critical.

SKIDSTEER ADAPTER
The AMI Skidsteer Adapter offers the flexibility and convenience of using skidsteer attachments on your excavator. The bolt-on lugging allows for rotation away from and towards the excavator.

FROST
Breakthrough frozen ground with the AMI Frost Bucket. The breakout force of your backhoe is fully applied to the specially designed teeth, powering through the frost line.

CONCRETE PULVERIZER
This heavy duty concrete pulverizer has a multi-positional stiff arm and is designed to pivot on the stick pin axis. It is available in multiple tine configurations and has replaceable wear parts.

DREDGING
Long and flat bucket floor profile provides easy maneuvering around water and sewer lines. Backfilling and packing is also enhanced with the flat floor.

LIFT ATTACHMENT
Handle heavy loads without damaging your bucket. AMI’s Lift Attachment ensures visibility and can lift loads 7.5 tons up to 20 tons. Clevis and hook option available.

TRAPEZOID
Lower your project costs by reducing the amount of backfill required with the AMI Trapezoid Bucket. Ideal for pipeline and trenching, the trapezoid eliminates the costs of transportation and backfill material.

ROCK SCREENING
Get what you want and leave the rest with the AMI Skeleton Bucket. Designed to effectively sift out rocks, brush or other large debris while leaving your backfill where it belongs.

SCREENING
This heavy duty concrete pulverizer has a multi-positional stiff arm and is designed to pivot on the stick pin axis. It is available in multiple tine configurations and has replaceable wear parts.

LONG AND FLAT BUCKET FLOOR PROFILE PROVIDES EASY MANEUVERING AROUND WATER AND SEWER LINES. BACKFILLING AND PACKING IS ALSO ENHANCED WITH THE FLAT FLOOR.

CONECRTE PULVERIZER
This heavy duty concrete pulverizer has a multi-positional stiff arm and is designed to pivot on the stick pin axis. It is available in multiple tine configurations and has replaceable wear parts.
The AMI Ripper Tooth is designed for initial breakup of dense, hard-packed material including frozen ground.

For wet, sticky soil that wants to pack tight rather than dump clean.
COUPLERS

HYDRAULIC PIN GRAB

From the safety of the cab, operators are now more productive using the innovative technology built into AMI Attachments' Hydraulic Couplers. The job of switching attachments that used to take up to thirty minutes and require two people, is now accomplished in only seconds with AMI Attachments. Improve job site safety and productivity with the AMI Hydraulic Pin Grab Coupler and Power Wedge Coupler.

HYDRAULIC WEDGE

Truly the leader in hydraulic wedge couplers, AMI offers the most innovative design features including compact size (even on full-size excavators) and an exclusive mechanical safety lock like nothing else ever invented.

The wedge coupler system gives you the full power of your excavator without sacrificing break-out force. The unique bucket lugging keeps the pin-to-tip radius exactly to factory specification.

HYDRAULICS

Add custom auxiliary hydraulics to your excavator. From valves and plumbing to in-cab controls, let AMI's trained installers fit your machine with the right hydraulic set-up for your attachments.
AMI's Progressive Link Thumb provides more constant pressure throughout the entire cylinder range. The thumb achieves more than 180 degree rotation making it easy to reach and pick up objects that are close to your excavator.

The AMI Hydraulic Stick Pivot means the thumb rotates on the same pivot as the original bucket pin. This single pivot point aligns the thumb tip and bucket teeth throughout the entire bucket rotation which ensures you always have a constant grip on the load.
All AMI products come with a 2 Year Limited Warranty
