

DANGLING ROTATING UTILITY GRAPPLE

www.amiattachments.com

ROCK SOLID PRODUCTIVITY

Strengthen your hold on landscaping projects and lumber yard applications with an AMI Rotating Utility Grapple. From armor stone retaining walls and detailed rock features to picking up and loading logs, the Rotating Utility Grapple features the precision and strength to move and position rocks, logs and hard to handle objects with outstanding efficiency.

Hydraulically-rotating 360 degrees, the Rotating Utility Grapple allows for openings up to 60", giving machine operators the ability to pick up and move both small and large objects. With a three-tine configuration that delivers exceptional gripping strength, the AMI Rotating Utility Grapple gives you the flexibility to pick, spin, stack and position each rock or log with incredible control.

LANDSCAPING • LUMBER APPLICATIONS

3-TINE CONFIGURATION

With a three-tine configuration that delivers exceptional gripping strength, the Rotating Utility Grapple is designed to give machine operators the flexibility to pick, spin, stack and position the load with incredible control.

Up to 60" OPENING

The Rotating Utility Grapple features openings up to 60" to pick up and move a variety of materials for any landscaping or lumber yard application.

HANGS PLUMB

Hanging plumb throughout your machine's entire tilt range, the Rotating Utility Grapple ensures predictable movement of heavy materials.

AMI Attachments is a certified member of the Hardox in my Body® program. This strict accreditation means that we provide our customers with buckets manufactured from genuine wear-resistant steel that sets the standard worldwide for being harder, tougher and lighter.

In the quest for stronger and lighter products, AMI Attachments relies on Strenx® high-performance structural steel. Working with Strenx® steel makes our attachments stronger, lighter, safer, more competitive and more sustainable.
