# EXCAVATORS

## Making inroads in mat handling

AMI Mat Handling Grapples are the most efficient method of stacking, placing, moving and fitting mats for any temporary platform application. For long winding access roads or large work site platforms, the AMI Mat Handling Grapple lays the groundwork quickly by maximizing the productivity of excavators and forwarders. Matting easily becomes a one-person job that is both safer and more productive than using cranes, boom trucks, chains and workers on the ground.

With different models available, AMI offers Mat Handling Grapples for different excavator sizes and various mat types.

- Wooden and composite access mats
- Larger steel reinforced rig mats
- Solid timber crane mats

Specially designed for excavators and forwarders, AMI Mat Handling Grapples are built to withstand the demands of major industries requiring minimal environmental disturbance.

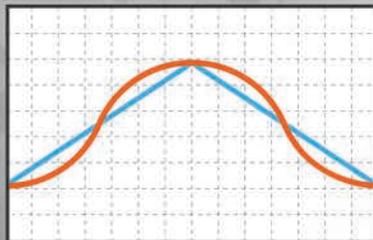

- Pipeline Construction
- Power Transmission
- Utilities & Wind energy
- Logging and Forestry
- Bridge Construction
- Highway and Infrastructure
- Mining

**Rotate  
360°**

**Proportional  
Controls**

The rotator and clamp respond with variable speed that you control, offering fine movements for precise positioning.

- Conventional 'Bang-Bang' Controls
- AMI Proportional Controls

**Single Auxiliary  
OPTION** GR4550RRMG, GR5500RRMG  
MODELS ONLY

By using a valve manifold, both the rotator and clamping functions are powered through one auxiliary port.

**Clamp & Rotate  
Simultaneously**

Pick and place mats with fluid-like productivity using both hydraulic functions at the same time.

**MODEL GR3345RTMG**Excavator 150-200 Series  
XR Rotator / Timber Style

Shorter arms designed for handling narrower but heavy crane mats or timber mats made from solid wood.

**MODEL GR3345RRMG**Excavator 150-200 Series  
XR Rotator

Compact rotator provides lower profile and less weight. Handles access mats, swamp mats and larger rig mats.

**MODEL GR4045RRMG**Excavator 200 Series  
902 Head

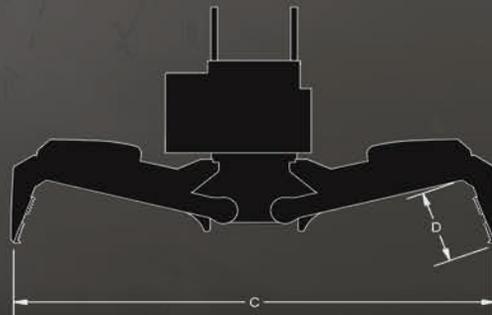

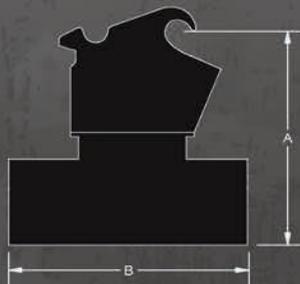

Greater torque and available valve-in-head for operating grapple and rotation using one auxiliary hydraulic. Designed for access mats, swamp mats and larger rig mats.

**MODEL GR4580RRMG**Excavator 250-300 Series  
1302 Head

For maximum productivity, handle up to five access mats, swamp mats or larger rig mats. Available valve-in-head for operating grapple and rotation using one auxiliary hydraulic.

**AMI EXCAVATOR MAT GRAPPLE SPECIFICATION CHART**

	GR3345RTMG (150-200, XR Rotator/Timber Style)	GR3345RRMG (150-200, XR Rotator)	GR4045RRMG (200, 902 Head)	GR4580RRMG (250-300, 1302 Head)
Grapple Height (A)	45 in	39 in	53 in	72 in
Jaw Width (B)	48 in	54-1/2 in	54-1/2 in	72-1/2 in
Grapple Open (C)	56-1/2 in	106 in	109 in	109 in
Tine Height (D)	18 in	18 in	18 in	26 in
Weight	2,250 lbs	3,530 lbs	4,040 lbs	5,840 lbs
Number of Mats	1	3	3	5
Auxiliary Ports Req'd	2	2	With Optional Valve in Head:	
			1	1

# WHEEL LOADERS & SKIDSTEERS

## Stable Load

The rear grip applies pressure further back from the tine tips for a more stable load during travel.

## Tip Grip

The front grip is close to the tine tips for grabbing mats by their edges for precise positioning.

## Below Tine

The front grip also bypasses the tines for sliding mats tight against each other.

## SKIDSTEERS

Blaze new trails with the AMI Skidsteer Mat Handling Grapple, offering impressive mat handling, rugged construction.

## WHEEL LOADERS

Blaze new trails with the AMI Wheel Loader Mat Handling Grapple, offering impressive mat handling, rugged construction and high visibility.

## Nitrate Treated Cylinder Rods

Improving durability, nitrate treated cylinder rods prevent pitting, increasing the life of the cylinders.

## Fully Enclosed Hoses & Fittings

Clear sight lines give operators full view of the action and keep all hydraulic hoses and fittings fully protected.
