AMI
SNOW BLADES

REACTOR

HYDRAULIC WING BLADE

When it comes to leading-edge versatility during the harshest winter conditions, look no further than the AMI Snowblades' Wheel Loader Hydraulic Wing Blade. Offering exceptional flexibility is the Wing Blade's quick coupler feature for independent coupling of the front angle blade. As an industry first, the quick attach on both the front angle blade and wing blade gives operators the ability to use each attachment together or individually.

With up to a 12 ft. wide mouldboard, extendible push pole with 25" extension, and a control valve with in-cab joystick controls, this blade assembly is designed for efficient snow removal and user-friendly setup. The Wing Blade provides an impressive 48" of level bench height and comes equipped with a reversible bolt-on edge.

WING BLADE CONTROLLER

For optimal precision performance, the Wing Blade's joystick control system features an ergonomic design that allows operators total control at their fingertips. Easy to use and versatile, this hand-held controller offers the functionality you need to maneuver through any type of weather.
