V-BOTTOM BUCKET

POWERFUL BREAKTHROUGH FOR EXTREME DIGGING

Don't let tough terrain keep you above the surface. Increase your productivity by breaking through fracturable rock, hard-packed soil or frozen ground with the AMI V-Bottom Bucket.

The breakout force of your excavator is fully applied to the specially designed and positioned teeth, powering through the frost line and ground. Manufactured using Hardox steel, built-in abrasion resistance increases your bucket life. Strong and durable, the AMI V-Bottom Bucket keeps you going.

HARDOX[®]
IN MY BODY

EXTREME DUTY – HARDER, TOUGHER, LIGHTER

Extra wear-resistance, lighter weight and tensile strength mean you can carry more and your bucket life is extended. Hardox[®] wear steel provides a unique combination of hardness and toughness, resulting in first-class products that are manufactured to perform better under the harshest conditions.

J SERIES ADAPTERS

Adding Twin Tigers or any other tooth of choice is easy with J Series adapters.

STAGGERED PROFILE

The V design allows for the teeth to be staggered and angled so the centre tooth penetrates first and guides the angle of the dig.

By pulling the bucket towards the excavator, the breakout force is first concentrated on the bottom, middle tooth and then cascades throughout the staggered profile, efficiently breaking up material.

AMI Attachments is a certified member of the Hardox in my Body® program. This strict accreditation means that we provide our customers with buckets manufactured from genuine wear-resistant steel that sets the standard worldwide for being harder, tougher and lighter.

In the quest for stronger and lighter products, AMI Attachments relies on Strenx® high-performance structural steel. Working with Strenx® steel makes our attachments stronger, lighter, safer, more competitive and more sustainable.

All AMI products come with a 2 Year Limited Warranty
